DIY Installation Guide

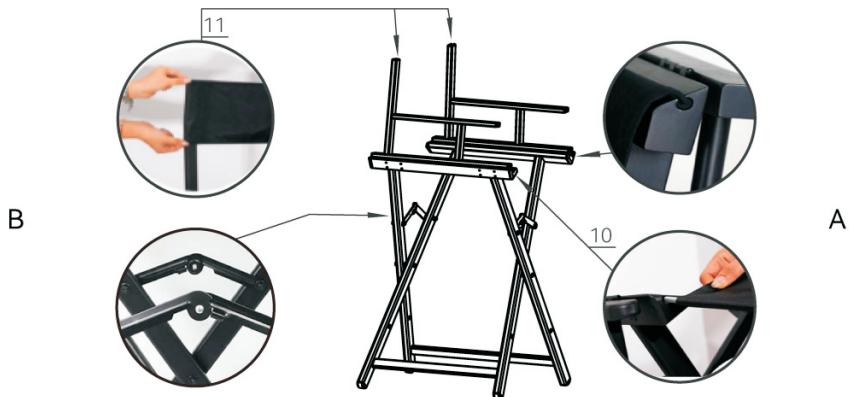

Step 1: Fixed Chair Frame

A: Take out the chair frame and use M6*62 screws, M6 nuts and 18*9 plastic gasket to fix it.

B: Use the hinges to link the left and right chair frames and reinforce them with M6*38 screws, M6 nuts and 16*2 gasket.

Step 2: Install the Seat Cushion and Backrest Cushion

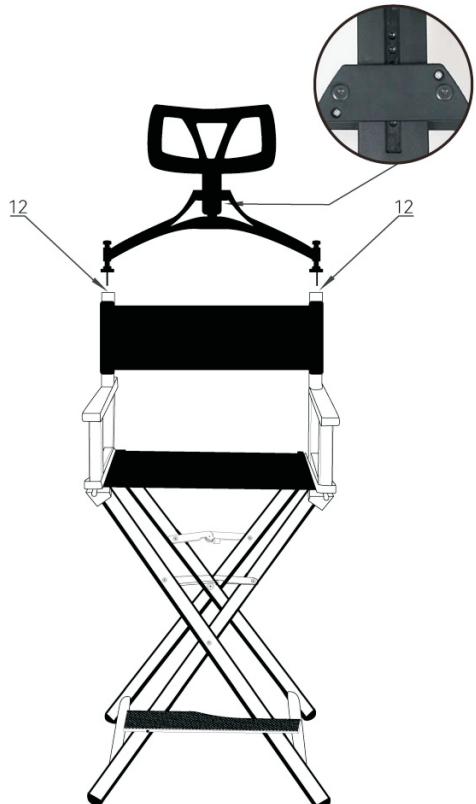

A: Insert the seat cushion with the roundbar into the recess of the chair frame.

B: Put on the backrest cushion, then press down the middle metal hinge to make the whole chair taut.

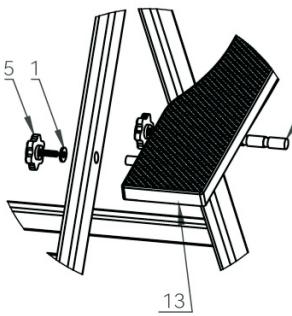

Step 3: Install the Headrest

A: Insert the headrest support frame into the notch at the top of the chair frame and fix it.

B: Then insert the headrest into the support frame hole and tighten the screws.

Step 4: Install the Footrest

A: Use M6*62 screws pass through the left side round hole of the footrest and the left side round hole of the chair frame, then he back side is locked with M6 Fancy Head Nuts.

B: Put the footrest bracket pass through the right side round hole of the chair frame, tighten it with M6 Fancy Head Nuts, and then installation is completed.
